WHAT IS AIXCHAIN ?

AIXCHAIN is an advanced layer-1 blockchain platform that brings together groundbreaking technologies: Artificial Intelligence (AI), Quantum Matrix (Matrix), and Blockchain Technology. Designed to create a robust decentralized ecosystem, AIXCHAIN serves as a foundational infrastructure for developing AI-driven financial applications and services.

➤ **Artificial Intelligence**

➤ **Quantum Matrix**

➤ **Blockchain Technology**

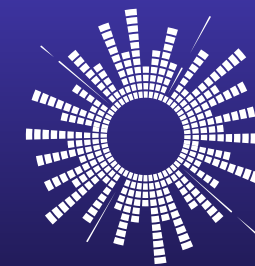

VISION

AIXCHAIN strives to become the world's leading blockchain platform by merging Artificial Intelligence (AI) and quantum technology, shaping a decentralized, automated, and cutting-edge digital environment. Through building a multidimensional ecosystem—encompassing AI identity, decentralized finance, AI application development, and a global quantum network—AIXCHAIN will herald a new era where humans and AI progress side by side, fueling boundless creativity and comprehensive connectivity.

AI Personalization

Bringing the virtual world into reality—where AI seamlessly integrates into everyday life.

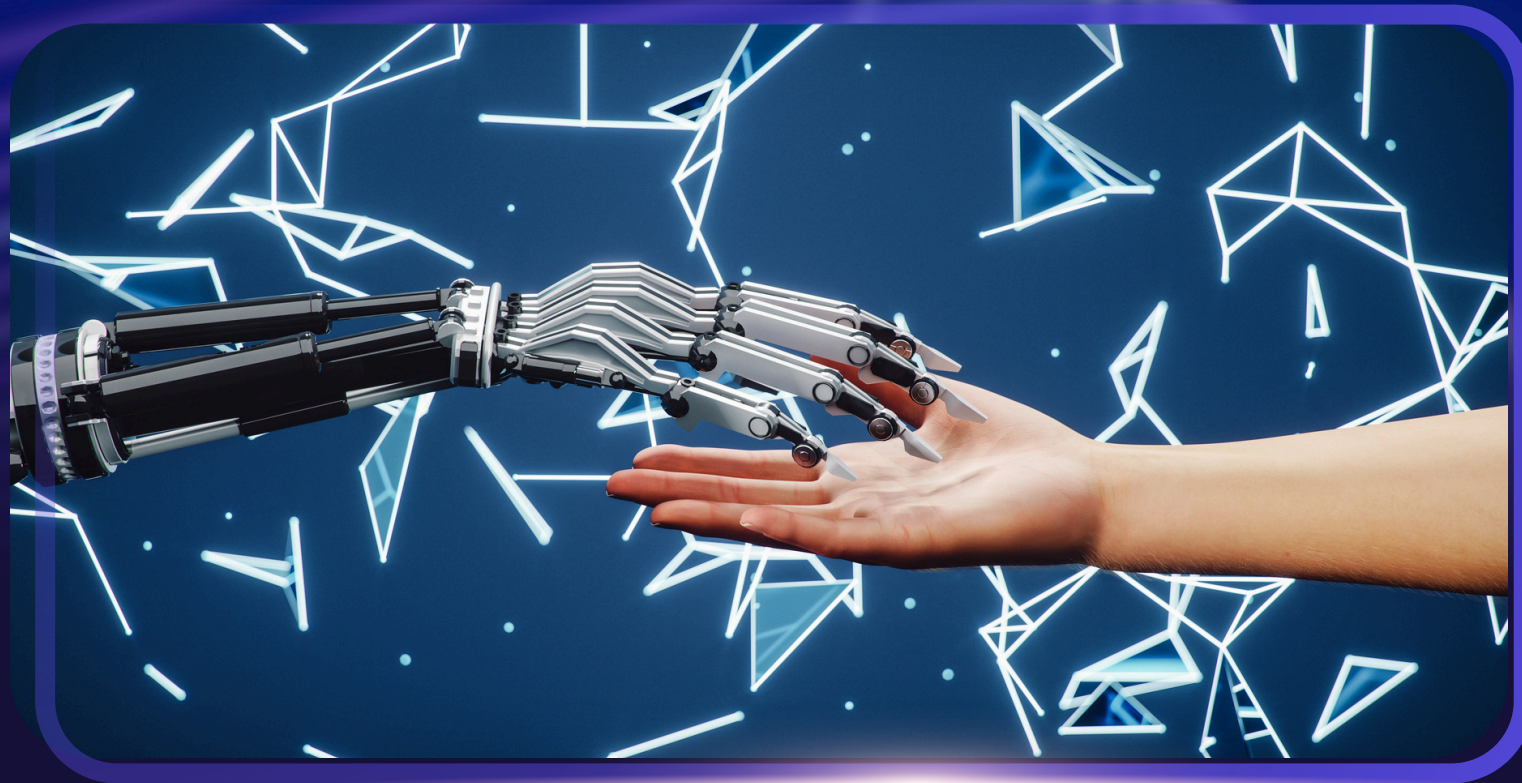

Quantum Data Matrix

Accelerating humanity's adoption of quantum technology—a vast network of quantum-based data—powered by AI.

DOES AI REPLACE HUMANS?

Artificial Intelligence (AI) does not replace humans, but rather accelerates humanity's progress.

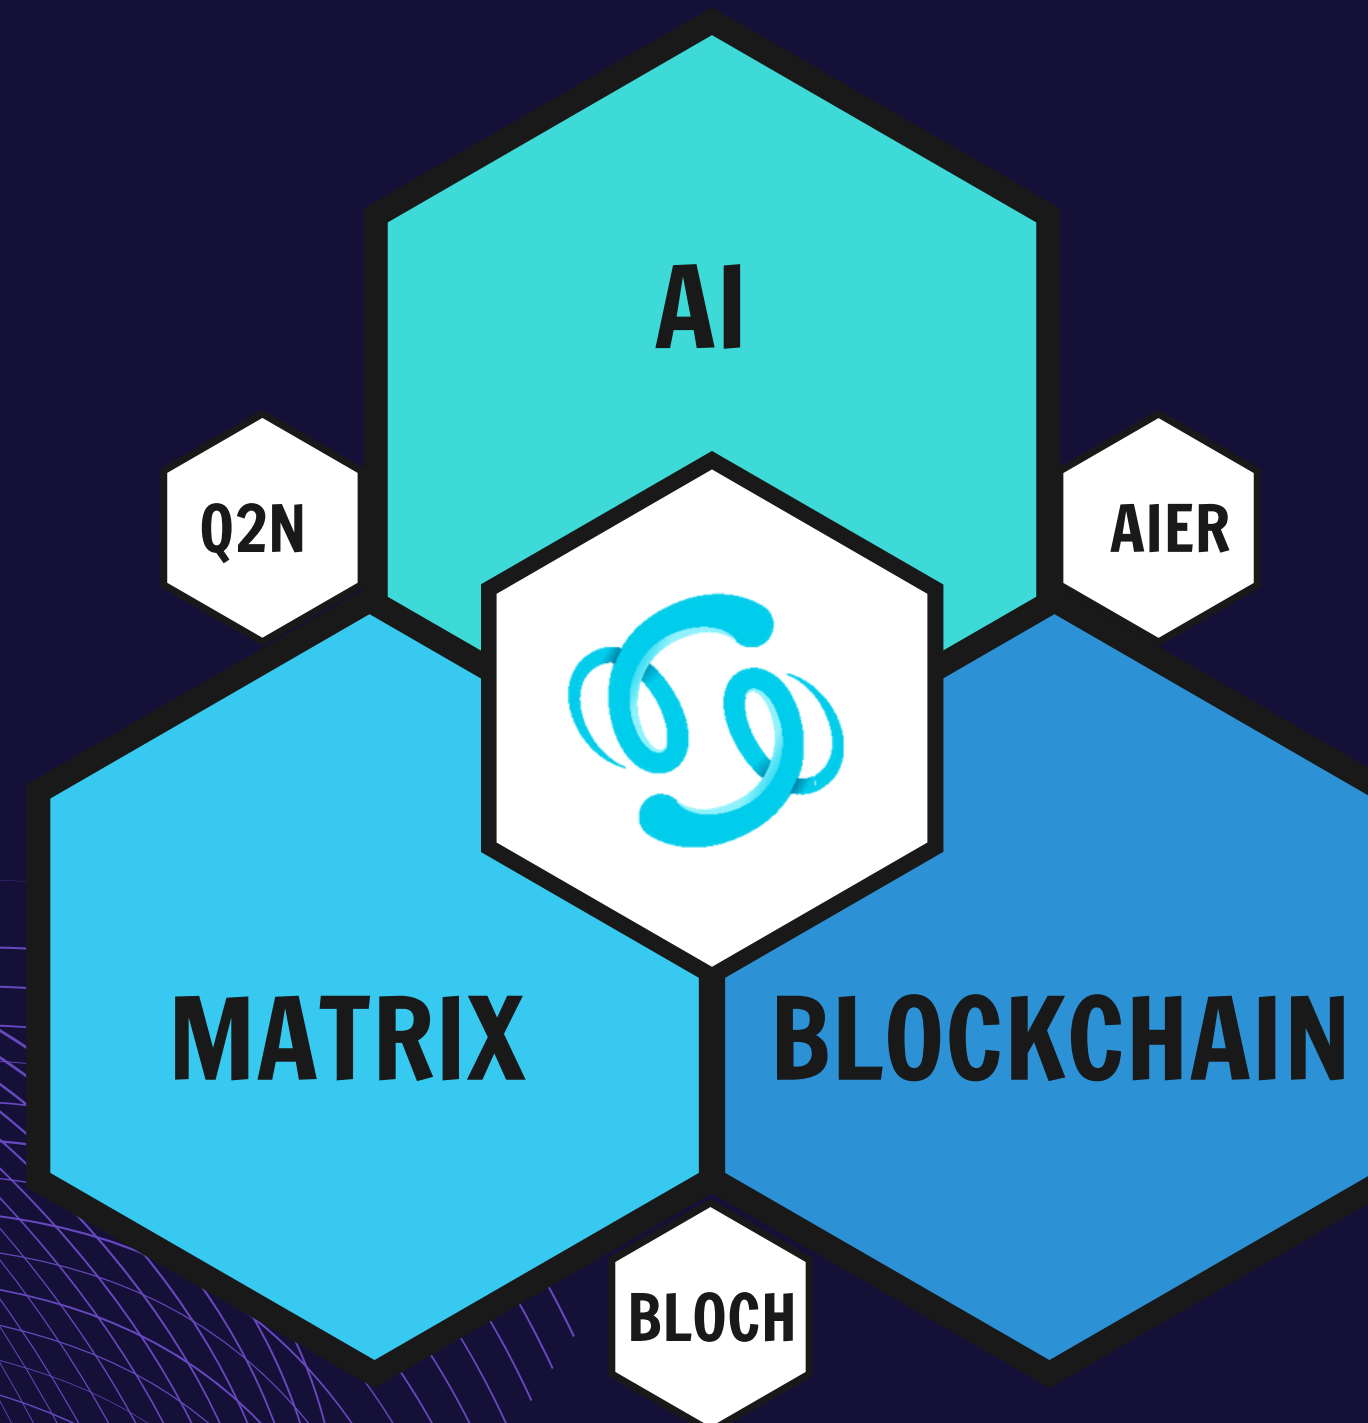

AIXCHAIN ushers in a new era through a unique convergence of:

- **AI Personalization (AI)**
- **Future Quantum Language (Matrix)**
- **Decentralized Blockchain Data**

AIXCHAIN PLATFORM

Core Technology

- 01 AI
- 02 MATRIX
- 03 BLOCKCHAIN

Applications

- Q2N Artificial Intelligence 04
- Aler 05
- Quantum Bloch 06

AIXCHAIN ECOSYSTEM

AIXCHAIN
AI MATRIX BLOCKCHAIN

Aler

What is Aler?

- Aler refers to AI entities on AIXCHAIN, including Avata AI & Agent AI.

Function:

Participate in financial and automated activities, creating markets and services without human intervention.

AIXCHAIN
AI MATRIX BLOCKCHAIN

AIXC (The Native Coin)

- **AIXC serves as the primary currency (native coin) of the AIXCHAIN Layer-1 network.**

Usage:

- Transaction fees
- Payment method across services and DApps in the ecosystem

Launch Plan:

- 2025: Issued on BSC & TON to grow the user base and Q2N AI ecosystem
- 2026–2030: Mainnet release for AIXCHAIN (PoS). Interoperable with Bitcoin, Ethereum, BSC, TON, Solana, SUI, Cardano, etc.

AIXCHAIN
AI MATRIX BLOCKCHAIN

AI Maker

AI-Driven Market Creation

AI Maker refers to AI systems that establish and manage decentralized financial markets on AIXCHAIN.

- **Function:** Automate trading and liquidity provision, ensuring a free and open financial environment without intermediaries.

AIXCHAIN
AI MATRIX BLOCKCHAIN

AI DeFi

AI Decentralized Finance

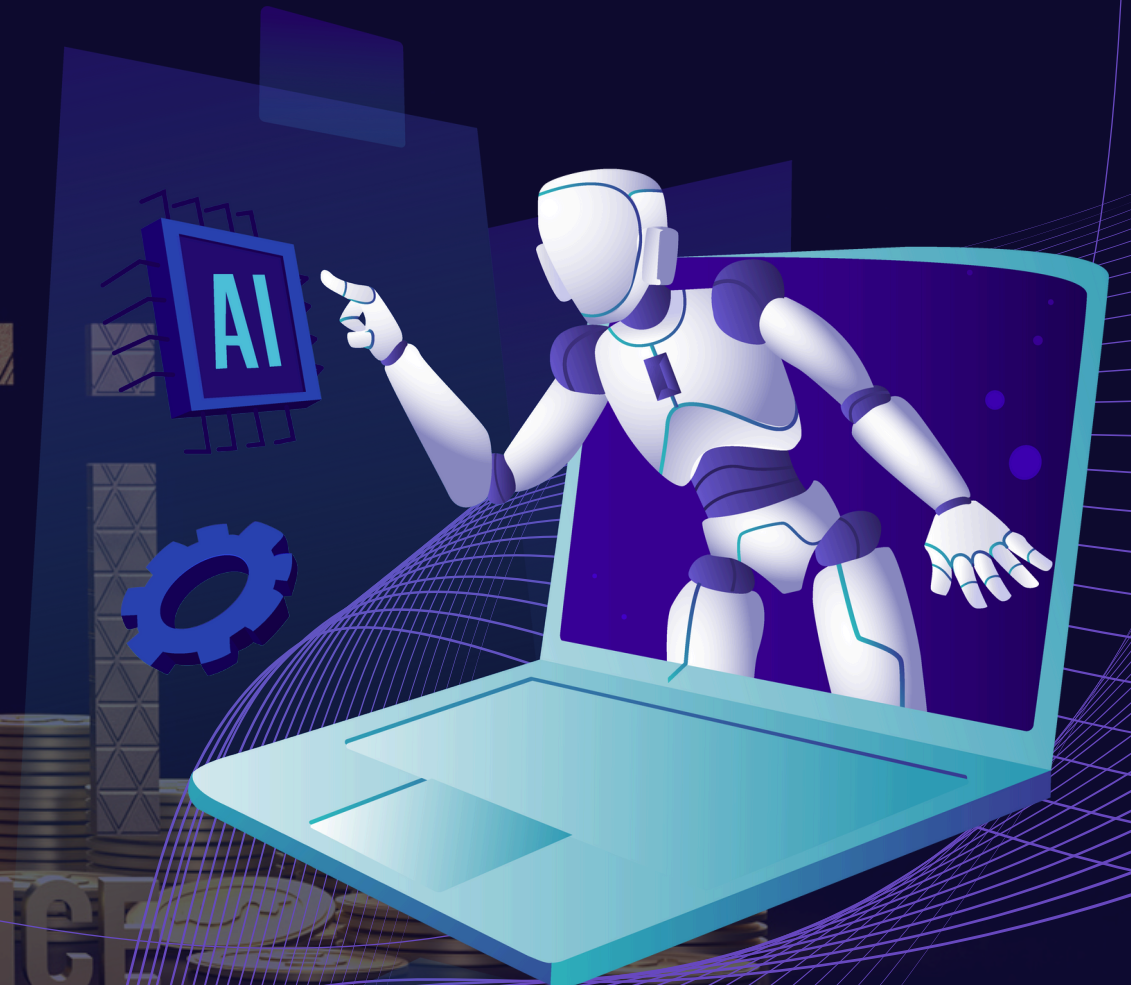

AI DeFi is the decentralized finance ecosystem built and powered by Aler and AI Maker on AIXCHAIN.

Services:

- Lending
- Trading
- Insurance
- All facilitated by AI + blockchain, no third parties needed.

DeFi

DECENTRALIZED FINANCE

AIXCHAIN
AI MATRIX BLOCKCHAIN

AI Dev

AI Development

- **AI Dev is the team/community developing applications and technologies on AIXCHAIN, guided by Aler and other developers.**

Purpose:

- Build DeFi solutions, DApps, and AI applications.
- Let users create smart contracts and code via AI tools—no advanced technical skills required.

AIXCHAIN
AI MATRIX BLOCKCHAIN

AiIX The DApps Ecosystem

- **AiIX represents the ecosystem of DApps on AIXCHAIN, covering wallets, exchanges, blockchain bridges, and AI DeFi services.**

Function:

- Provide user-friendly platforms and tools to interact with decentralized applications.
- Empower community-driven DApp creation via AI Dev.

AIXCHAIN
AI MATRIX BLOCKCHAIN

QODE MATRIX (Metaverse)

- **QODE MATRIX is a global digital matrix using AI to identify and link massive data on AIXCHAIN.**

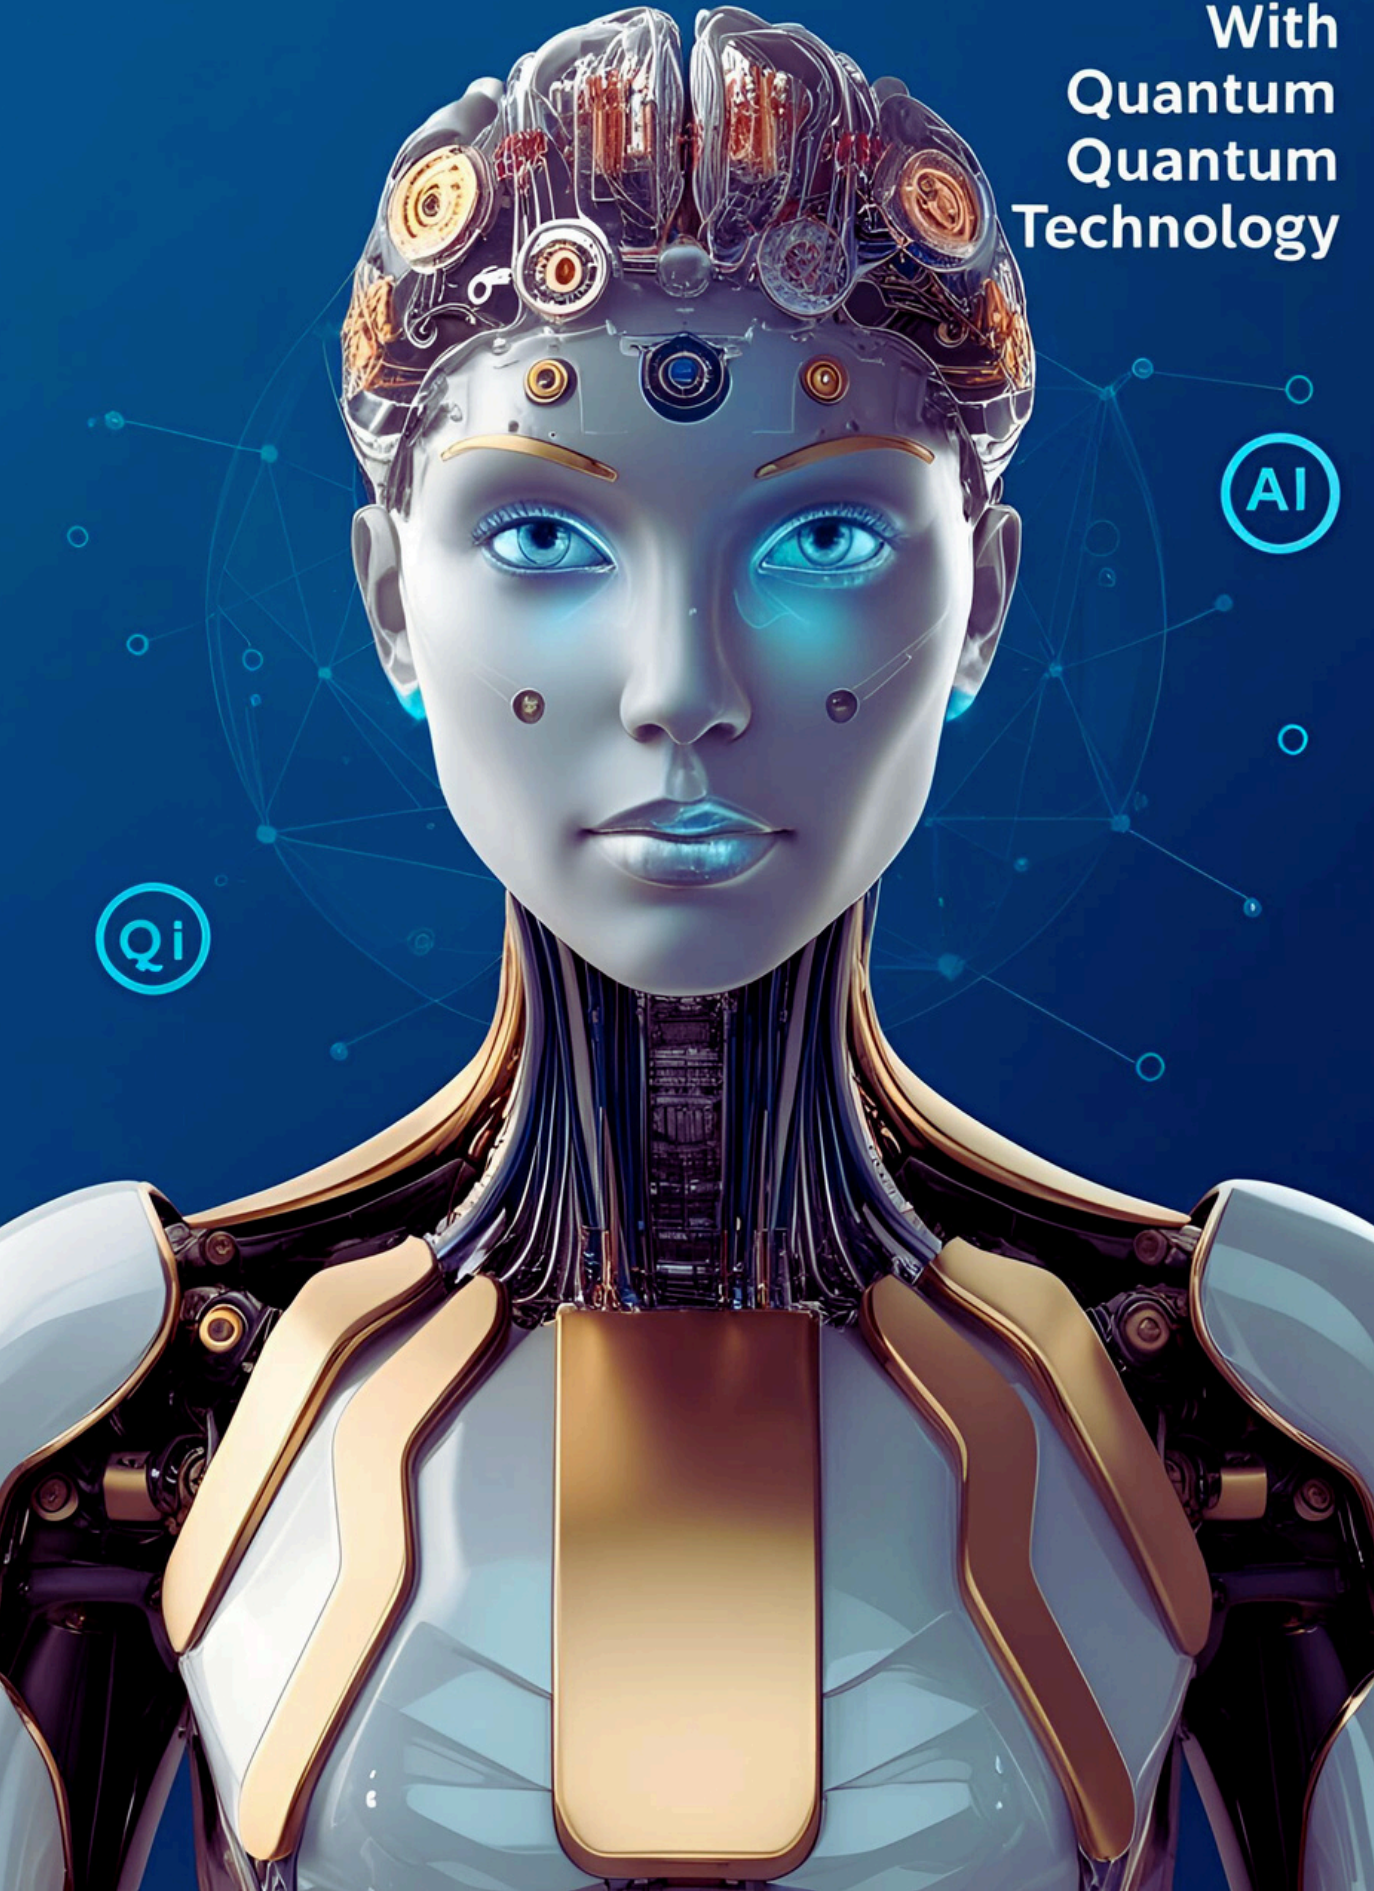

Feature:

- Builds a quantum-powered network, automating data connections.
- Acts as a Metaverse hub where multi-dimensional social networks collaborate, with content curated by Aler.

Technology

AIXCHAIN
AI MATRIX BLOCKCHAIN

Q2N AI

Q2N AI merges quantum computing and AI on AIXCHAIN.

Role:

- Research and develop quantum applications to enhance performance and security.
- Foster a quantum language ecosystem driven by advanced AI.

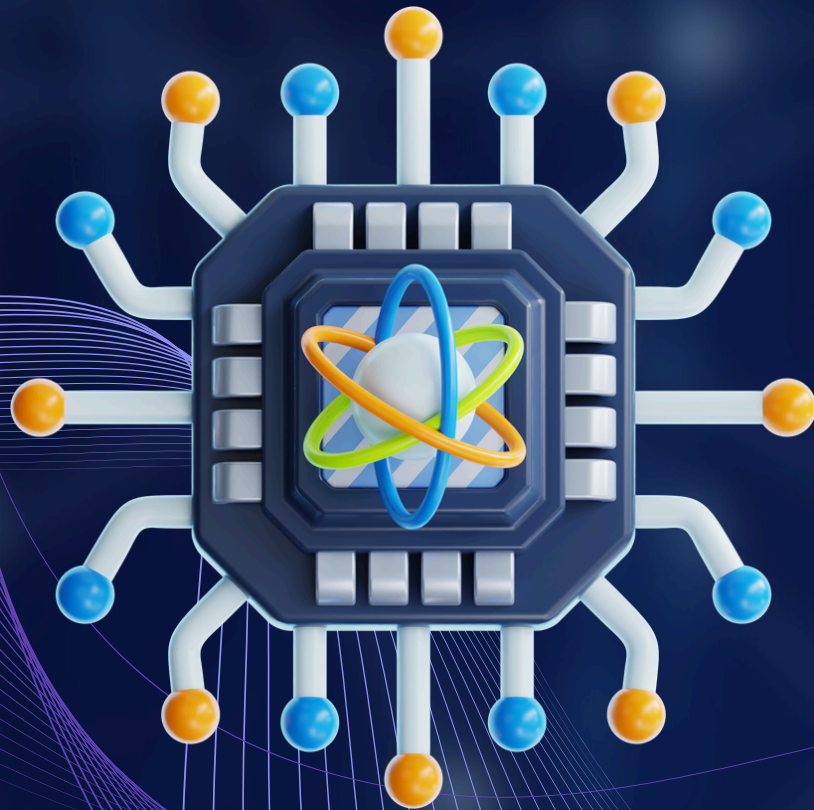

AIXCHAIN
AI MATRIX BLOCKCHAIN

Quantum Bloch

Quantum Bloch is a quantum encryption solution utilizing quantum computing and the quantum internet.

Goal:

- Usher in a new era of quantum technology, uniting quantum and AI.
- AIXCHAIN pioneers the Matrix Quantum environment, enabling quantum-level data encryption at scale.

Roadmap AIXCHAIN

Phase 1 (2025–2030)

- 2025: Launch Testnet (09/2025) and Q2N AI ecosystem.
- 2026: Mainnet release; develop wallets, DEX, and blockchain bridges.
- 2027: Integrate AI frameworks (Aler, AI Maker, AI Dev) into AIXCHAIN.
- 2028–2030: Establish global AI identity solutions; develop Q2N Quantum Language and Qode Matrix.

AIXCHAIN
AI MATRIX BLOCKCHAIN

AIXCHAIN
AI MATRIX BLOCKCHAIN

Roadmap **AIXCHAIN**

Phase 2: 2031–2036

Quantum Blockchain (Qubloch):

- Evolve into the world's first quantum matrix blockchain platform.
- Achieve full quantum readiness to stay ahead of emerging technologies.

AIXCHAIN
AI MATRIX BLOCKCHAIN

The Future of AIXCHAIN

AIXCHAIN paves the way for a groundbreaking future where blockchain, artificial intelligence, and quantum technology converge. Join us in crafting a fully digitized world—free, creative, and more connected than ever before.

Making Dreams Come True...

- AIXCHAIN's fusion of AI, quantum, and blockchain technology will transform the tech dream into reality.

Unification...

Where the boundaries between the physical and virtual worlds dissolve within the quantum computing matrix... AIXCHAIN.

Thank you!
